DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: As for claim 1, the Prior Art teaches a horizontal cutoff line (US Pat 4646207) and a row of light emitting chips (US Pat 5779341) but fails to teach a horizontal cutoff line in conjunction with an upward protrusion that protrudes from the horizontal cutoff line which is comprised from a plurality of horizontally arranged light emitting chips, whose light is inverted by a projection lens.

As for claim 6, the Prior Art fails to teach a luminous distribution pattern with an upwardly extending oblique component formed by a projection lens which has three lighting systems, including the third system comprised of parallelogram-shaped light emitting units that are horizontally positioned on an arcuate shaped plane.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Reinbach is cited because of having parallelogram shaped LED chips disposed at an angle on the base of the device.
